DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-4 are rejected under 35 U.S.C. 102(b) as being anticipated by Poplawski et al. (5,879,173).

Poplawski et al., figure 14, disclose a pluggable transceiver comprising :

- a housing (512) having a front wall (516) which defining a receptacle (532) for receiving a fiber optic connector (column 13, lines 49-52); and
- a release mechanism (590, the applicant does not claim what member is going to release) including a faceplate (A, attachment) pivotably connected to the housing such that the faceplate is rotatable from a first position in which the faceplate is positioned over the front surface (590') of the housing to a second position in which the faceplate is pivoted away from the front surface (590) of the housing.

Regarding claim 2, figure 14, the faceplate defining a front opening that is aligned with the receptacle when the faceplate is in the first position.

Regarding claim 3, figure 14, the faceplate including a top wall (591) that is positioned to block insertion of the fiber optic connector into the receptacle when the faceplate is in the second position (590).

Regarding claim 4, figure 14, the top wall including a curved surface shaped (598) to facilitate manual removal of the pluggable transceiver (the Examiner interpreted that the release mechanism (590) is removed from the housing 512).

Allowable Subject Matter

3. Claims 9-20 are allowed.
4. Claims 5-8 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
5. The following is an examiner's statement of reasons for allowance:

Regarding claim 5, none of the reference discloses a pin inserted into a first through hole formed adjacent to the front surface of the housing, and inserted into a second through hole defining in a flange of the faceplate, in combination with the other claimed elements of the embodiments recited.

Regarding claims 6-20, none of the reference discloses the faceplate including a cam positioned to displace a first end of a lever when the faceplate is moved into the second position, in combination with the other claimed elements of the embodiments recited.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
